Is your hardware just too slow and outdated but you are happy with your software? Did a major part just die and its cost plus labor is a good percentage the cost of a new system? For those who weren't budgeting on a new PC, here's our solution: a new PC. At additional labor cost, we'll transfer your current retail Operating System or sell you a new one. Same software with all-new, fast hardware and a brand spankin'-new warranty.
